

WBC 57 – Transport Assessment Mapping Explanatory Note

The mapping shows the length of delay for each section of road with a delay in excess of 2 minutes, including locations in and around Reading Town Centre. Please note that the first zoomed out map does not always show all values for each section. The missing values are however visible on the more zoomed in maps which follow, so providing full coverage and interpretation.

When preparing the maps, a single coding error within the model has been identified on Kings Road, in Reading town centre. This results in an anomalous figure at his location within both the TA Appendix I – Delays, and Appendix J – Delay Difference. Our consultants Stantec advise that was not previously identified as validation exercises focus on locations which are material to the local authority and not more distant locations. Kings Road is around 2km from the nearest boundary of Wokingham Borough, within Reading town centre.
